NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2011

1. Statement of Significant Accounting Policies

Basis of Preparation

The financial statements are general purpose financial statements that have been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001*.

WAM Active Limited is a listed public company, incorporated and domiciled in Australia.

Australian Accounting Standards set out accounting policies that the Australian Accounting Standards Board has concluded would result in a financial statements containing relevant and reliable information about transactions, events and conditions. Compliance with Australian Accounting Standards ensures the financial statements and notes also comply with International Financial Reporting Standards. Material accounting policies adopted in the preparation of these financial statements are presented below. They have been consistently applied unless otherwise stated.

The financial statements have been prepared on an accruals basis and are based on historical costs with the exception of financial assets and certain other financial assets and liabilities which have been measured at fair value.

a) Financial Instruments

i. Initial Recognition and Measurement

Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions of the instrument. Trade date accounting is adopted for financial assets that are delivered within timeframes established by market convention. Trade date is the date on which the Company commits to purchase or sell the assets.

Financial instruments are initially measured at fair value. Transaction costs related to instruments classified "at fair value through profit or loss" are expensed to the Statement of Comprehensive Income immediately. Financial instruments are classified and measured as set out below.

ii. Classification and Subsequent Measurement

Investments consist of shares in publicly listed and unlisted companies, exchange traded call and put options and investments in fixed interest securities.

It is considered that the information needs of shareholders in a company of this type are better met by stating investments at fair value rather than historical cost and by presenting the Statement of Financial Position on a liquidity basis.

The Company may short sell securities in anticipation of a decline in the market value of that security, or it may short sell securities for various arbitrage transactions. Short sales or borrowed stock are classified as a financial liability and are revalued to fair value through the Statement of Comprehensive Income.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2011

1. Statement of Significant Accounting Policies (cont'd)

a) Financial Instruments (cont'd)

iii. *Financial assets "at fair value through profit or loss"*

Financial assets are classified at fair value through the Statement of Comprehensive Income when they are held for trading for the purpose of short term profit taking. Realised and unrealised gains and losses arising from changes in fair value are included in the Statement of Comprehensive Income in the year in which they arise. Unrealised gains and losses are then transferred to an asset revaluation reserve, net of the potential tax charges that may arise from the future sale of the investments, where they are above cost.

iv. *Financial Liabilities*

Financial liabilities are classified at fair value through the Statement of Comprehensive Income. Realised and unrealised gains and losses are then transferred to an asset revaluation reserve, net of the potential tax charges that may arise from the future sale of the investments, where they are above cost.

v. *Fair Value*

Fair value is determined based on current market prices for all quoted investments. Valuation techniques are applied to determine the fair value for all unlisted securities, include recent arm's length transactions and reference to similar instruments.

vi. *Derecognition*

Financial assets are derecognised where the contractual rights to receipt of cash flows expires or the asset is transferred to another party, whereby the Company no longer has any significant continuing involvement in the risks and benefits associated with the asset. Financial liabilities are derecognised where the related obligations are either discharged, cancelled or expire. The difference between the carrying value of the financial liability extinguished or transferred to another party and the fair value of consideration paid, including the transfer of non-cash assets or liabilities assumed, is recognised in the Statement of Comprehensive Income.

b) Income Tax

The charge of current income tax expense is based on the profit for the year adjusted for any non-assessable or disallowed items. It is calculated using the tax rates that have been enacted or are substantially enacted by the end of the current financial year. Current tax liabilities (assets) are measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred tax is accounted for using the Statement of Financial Position liability method in respect of temporary difference arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or liability is settled. Deferred tax is credited in the Statement of Comprehensive Income except where it relates to items that may be credited directly to equity, in which case the deferred tax is adjusted directly against equity.

Deferred tax assets relating to temporary differences and unused tax losses are recognised, to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2011

1. Statement of Significant Accounting Policies (cont'd)

b) Income Tax (cont'd)

Current tax assets and liabilities are offset only where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are only offset where a legally enforceable right of set-off exists, the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

c) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, at call deposits with banks or financial institutions and other fixed interest securities maturing within three months or less.

d) Revenue and Other Income

Interest revenue is recognised using the effective interest rate method, which, for floating rate financial assets, is the rate inherent in the instrument. Dividend revenue is recognised when the right to receive a dividend has been established. All revenue is stated net of the amount of goods and services tax (GST).

e) Trade and Other Receivables

Trade and other receivables are non-derivative financial assets and are initially recognised at fair value. They are subsequently stated at their amortised cost less the provision for impairment losses [refer Note 1(g)].

f) Trade and Other Payables

Trade and other payables are non-derivative financial liabilities and are stated at their amortised cost.

g) Impairment of Assets

At each reporting date, the Company reviews the carrying values of its tangible assets to determine whether there is any indication that those assets may be impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the Statement of Comprehensive Income.

h) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of GST, except where the amount of the GST incurred is not recoverable from the Australian Taxation Office (ATO). In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense.

Receivables and payables are stated inclusive of GST. The net amount of GST recoverable from, or payable to, the ATO is included as an asset or liability in the Statement of Financial Position.

Cash flows are presented in the Statement of Cash Flows on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

i) Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2011

1. Statement of Significant Accounting Policies (cont'd)

j) Critical Accounting Estimates and Judgements

The Directors evaluate estimates and judgements incorporated into the financial report based on historical knowledge and the best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data.

There are no estimates or judgements that have a material impact on the financial results of the Company for the year ended 30 June 2011.

k) New Standards and Interpretations not yet Adopted

The Australian Accounting Standards Board has issued a new accounting standard AASB 9: Financial Instruments and AASB 2009-11: Amendments to Australian Accounting Standards arising from AASB 9 that has a mandatory application date for future reporting periods. The Company has decided against early adoption of this standard. This standard does not materially impact the Company.

a) Ordinary Dividends Paid during the Year

| | 2011 \$ | 2010 \$ |
|---|-------------------------|-----------------------|
| Final Dividend FY2010: 3.0 cents per share fully franked at 30% tax rate paid 24 September 2010 (2010: 2.0 cents) | 468,281 | 308,002 |
| Interim Dividend FY2011: 4.0 cents per share fully franked at 30% tax rate paid 31 March 2011 (2010: 3.0 cents) | <u>637,367</u> | <u>464,677</u> |
| Dividends paid by the Company | <u><u>1,105,648</u></u> | <u><u>772,679</u></u> |

b) Dividends not recognised at Year End

In addition to the above dividends, since the end of the year, the Directors have declared the following dividend which has not been recognised as a liability at the end of the financial year:

| | | |
|--|-----------------------|-----------------------|
| Final dividend for the year ended 30 June 2011 of 4.0 cents per share fully franked at 30% tax rate payable 30 September 2011. | <u><u>642,666</u></u> | <u><u>468,144</u></u> |
|--|-----------------------|-----------------------|

c) Dividend Franking Account

Balance of franking account at year end adjusted for franking credits, arising from payment of provision for income tax and dividends recognised as receivables and franking credits that may be prevented from distribution in subsequent financial years.

| | | |
|--|-----------------------|-----------------------|
| | 840,152 | 703,386 |
| Subsequent to the reporting period, the franking account would be reduced by the proposed dividend disclosed in b) above as follows: | <u>(275,428)</u> | <u>(200,633)</u> |
| | <u><u>564,724</u></u> | <u><u>502,753</u></u> |

The Company's ability to continue to pay franked dividends is dependent upon the receipt of franked dividends from investments and the Company paying tax.

The balance of the franking account does not include the tax to be paid on unrealised investment gains and accrued income currently recognised as a deferred tax liability of \$116,658 (2010: \$132,103).

10. Issued Capital (cont'd)

c) Capital Management

The Board manages the Company's capital by regularly reviewing the most efficient manner by which the company employs its capital. At the core of this management is the belief that shareholder value should be preserved. Shareholder value will be preserved through the management of the level of distributions to shareholders, share and options issues as well as the use of share buy-backs. These capital management initiatives will be used when deemed appropriate by the Board.

d) Options

In the prior year the Company issued 15,489,219 options to acquire fully paid ordinary shares exercisable at \$1.15 per option. During the year to 30 June 2011 286,292 options were exercised (2010: 2,500). The remaining unexercised options expired worthless on 30 April 2011.

16. Financial Risk Management

The Company's financial instruments consist of listed and unlisted investments, trade receivables, trade payables and borrowed stock.

The terms and conditions including interest rate risk of each class of financial asset, financial liability and equity instrument, both recognised and unrecognised at balance date, are included under the appropriate note for that instrument.

Under delegation from the Board, the Manager has the responsibility for assessing and monitoring the financial market risk of the Company. The Manager monitors these risks daily. On a formal basis the investment team meet on a weekly basis to monitor and manage the below four risks as appropriate.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2011

16 Financial Risk Management (cont'd)

a) Credit Risk

The standard defines this is a risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge a contracted obligation. The Manager monitors the credit worthiness of counterparties on an ongoing basis and evaluates the credit quality of all new counterparties before engaging them.

The maximum exposure to credit risk on financial assets, excluding investments, of the Company which have been recognised on the Statement of Financial Position, is the carrying amount net of any provision for impairment of those assets.

The Manager is responsible for ensuring there is appropriate diversification across counterparties and that they are of a sufficient quality rating. The Manager is satisfied that the counterparties are of sufficient quality and diversity to minimise any individual counterparty credit risk. The majority of the Company's receivables arise from unsettled trades at year end which are settled three days after trade date. Engaging with counterparties via the Australian securities exchange facilitates the Company in both mitigating and managing its credit risk.

The Company is not materially exposed to credit risk on its fixed interest securities as the majority of cash and fixed interest securities are held with Australian banks who have a Standard and Poor's short rating of A-1+ and long term rating of AA. Also the majority of maturities are within four months.

None of the assets exposed to credit risk are overdue or considered to be impaired.

b) Liquidity Risk

Liquidity risk represents the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

The Company's major cash payments are the purchase of securities and dividends paid to shareholders, the levels of which are managed by the Board and the Manager.

The Company's cash receipts depend upon the level of sales of securities, dividends and interest received and the exercise of Company options that may be on issue from time to time.

The Manager monitors the Company's cash-flow requirements daily by reference to known sales and purchases of securities, dividends and interest to be paid or received. Should these decrease by a material amount the Company can alter its cash outflows as appropriate. The Company also holds a portion of its portfolio in cash and fixed interest securities sufficient to ensure that it has cash readily available to meet all payments. Furthermore the assets of the company are largely in the form of tradeable securities which if liquidity is available, can be sold on market if necessary.

| Total Liabilities | 132,103 | 2,118,220 | 2,250,323 |

c) Market Risk

Market risk represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

By its nature, as a listed investment company that invests in tradeable securities, the Company will always be subject to market risk as it invests its capital in securities which are not risk free as the market price of these securities can fluctuate.

The Manager seeks to manage and reduce the market risk of the Company by diversification of the investment portfolio across numerous stocks and multiple industry sectors. The relative weightings of the individual securities and market sectors are reviewed daily and the risk managed on a daily basis. The Company does not have set parameters as to a minimum or maximum amount of the portfolio that can be invested in a single company or sector.

|-----------------------------------|----------|
| Signature Capital Investments Ltd | 5.6% |

| Company Name | 2010 (%) |
|--------------|----------|
| N/A | N/A |

d) Interest Rate Risk

The Company's interest bearing financial assets expose it to risks associated with the effects of fluctuations in the prevailing level of market interest rates on its financial position and cash flows. The Company however is not materially exposed to interest rate risk as the majority of its fixed interest securities mature within three months.

e) Sensitivity Analysis

Investments represent 39% (2010: 22%) of gross assets at year end. A 5% movement in the market value of each of the companies within the portfolio would result in a 1.9% (2010: 1.1%) movement in the net assets after tax. This would result in the net asset backing after tax moving by 2.1 cents per share using the 30 June 2011 numbers (2010: 1.2 cents per share).

f) Financial Instruments Measured at Fair Value

The financial assets and liabilities recognised at fair value in the Statement of Financial Position have been analysed and classified using a fair value hierarchy reflecting the significance of the inputs in making the measurements. The fair value hierarchy consists of the following levels:

Level 1: Quoted prices in active markets for identical assets or liabilities

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly (as prices or indirectly (derived from prices)).

Level 3: Inputs for the asset or liability are not based on observable market data (unobservable inputs).

Included within Level 1 of the hierarchy are listed investments. The fair value of these financial assets and liabilities have been based on the closing quoted last sale prices at the end of the reporting period, excluding transaction cost.

In valuing unlisted investments, included in Level 2 of the hierarchy, valuation techniques such as those using comparisons to similar investments for which market observable prices are available or the last sale price have been adopted to determine the fair valued of these investments.

| 30 June 2011 | Level 1 | Level 2 | Level 3 | Total |
